The screenshot shows a web application interface for managing project-related articles. At the top, there is a navigation bar with icons for 'Email Articles', 'Export Citations', and 'Download PDF'. Below this, a list of articles is displayed. The first article is titled 'Changes of organizations by projects' and is from the 'International Journal of Project Management, In Press, Corrected Proof'. The author is 'Roland Gareis'. There are links for 'Preview', 'PDF (3334 K)', and 'Related Articles'. Below the article list, there are tabs for 'Abstract', 'Figures', 'Tables', and 'References'. The 'Abstract' tab is selected, showing the beginning of the article text. The text discusses the relationship between changes, processes, programmes, and projects, and mentions 'management' in several places. There are several blue callout boxes with Persian text overlaid on the screenshot, providing additional information or instructions in Persian.

1. **Changes of organizations by projects**
International Journal of Project Management, In Press, Corrected Proof
Roland Gareis
[Preview](#) [PDF \(3334 K\)](#) [Related Articles](#)

Abstract | **Figures** | **Tables** | **References**

...s, profit and cost centres, as well as temporary
Different change types, namely organizational learning,
...ing can be described by specific chains of processes.
...izations projects and programmes can be applied.

In the literature the differences between changes, processes, programmes and projects are not clearly defined and therefore also change **management** is not related appropriately to process, project and programme **management**. There exists a misperception regarding the relationship between changes and programmes (and projects). Changes are perceived to be managed within programmes (and projects) instead of perceiving programmes (and projects) as organizations to manage the changes.

For the definition of change types, of change objects and for the description of changes an action research approach was applied. The author developed together with representatives of different client organizations models for change **management** and applied those as practical solutions for these organizations.
