Thesis

1. Prevention of IOP increases during tracheal intubation with fentanyl, sufenta, Alfenta.
2. Comparison the cardiovascular effects of atracurium, vecuronium and pancuronium.
3. Comparison the Hemodynamic effects and recovery time of propofol and nesdonal in outpatient surgery.
4. Endobronchial intubation and one lung anesthesia.
5. Use of venous blood instead of arterial blood for evaluating the cardiac surgery patients at the operating room and ICU.
6. Effects of premeditations on blood pressure and heart rate during intubation.
7. The effect of adding clonidine to bupivacaine in pediatric caudal anesthesia.
8. The etiology and outcome of patients at neurology ICU - A one year review.
9. Comparison the surgical and medical treatment of thyroid cancer.
10. The effect of halothome and scopolamine on the memory in rat.
11. The effect of Isoflurane on the memory in rat and protective effects of peracetam.
12. Assessment of relationship between cerebral oxygen saturation changes during cardiac surgery and postoperative neurologic complications.

Membership

- 1- The board member of Anesthesiology certification exams (within 1994-1998-1999-2000-2005).
- 2- The committee member of intensive care medicine (ICM) fellowship program of ministry of health and medical education.
- 3- The member of research committee of cardiovascular research center of Tabriz University of medical sciences.
- 4- The member of cardiovascular research center of Tabriz University of medical sciences.
- 5- The member of Anesthesiology commission of East Azerbaijan legal medicine organisation.
- 6- Anesthesiology consultant of Tabriz medical council.
- 7- The member of Iranian society of anesthesiology and critical care.
- 8- The member of international association for the study of pain (IASP).
