Innovations:

Performing Maze III operation for the first time in Iran

Using Radial artery as a conduit in CABG for the first time in Tabriz university

Preserve and repair of Aortic valve in acute aortic dissection instead of Bentall operation

Using valved patch for repair of large ventricular septal defect with systemic pulmonary hypertension

using monocusp valve by 0/1 millimeter Gortex patch for reconstruction of pulmonary valve in severe Tetralogy of Fallot

Starting and continuing of off pump coronary artery bypass in Tabriz university

Aortic valve replacement and Bentall operation via ministernotomy approach

On pump beating CABG in high risk coronary artery disease

Inducing of systemic hyperkalemia for protection of heart in high risk and redo open heart surgery
