Ehsan Sepehran MD

Assistant r of urology department of Tabriz University of medical science. Tabriz.Iran- fellowship of Endo laparoscopy

Course duration: 3-6 month

Venue: Imam Reza teaching hospital

Course description: Over last few years, the minimally invasive approach has gradually superseded the conventional open approach in several urological surgery indications.

This minimally invasive approach has allowed to improve the quality and accuracy of interventions and to ensure their safety, mainly for cancer treatment.

Surgical progress combined with conventional laparoscopy have gradually taken off and led to enhanced precision surgery.

All urological procedures using these laparoscopic techniques make up these training programs in urological surgery.
